DIGITAL 2.4G
Our digital 2.4GHz technology has the fastest wireless data transmission and virtually eliminates interference and crosstalk.

ISCTec™
Revolutionary patent pending Integrated Speed Cadence Technology (ISCTec™) sensor. Combines both measurements in a single unit that mounts quickly on virtually any chainstay.

FlexTight™
FlexTight™ bracket helps you get rolling fast. Mounts quickly and securely on any handlebar or stem without tools.

ClickTec+ · ClickTec™
The simple and effective ClickTec™ mode button makes toggling through functions as easy as possible. By integrating the toggle switch into the face of the computer itself, CatEye has eliminated the frustration of having to feel or look for the right button while riding. The cantilevered computer body allows the portion of the screen pushed to act as the button itself, creating a sleek, concealed-button appearance and maximizing display space.
